

# AX MENTOR AXADMIN

*Command & Control: Anywhere, Anytime*

## WHAT IS IT?

The AXAdmin App is a robust monitoring platform for Microsoft Dynamics AX™. The first of its kind, this app breaks new grounds delivering options for busy IT Managers and AX System Administrators to easily access AX system and environment information on-demand. Early insight on performance issues and avoiding downtime enable your business and teammates to reach greater goals.\*

\*For use with Microsoft Dynamics AX 2012 RTM, R2, and R3.

# AXMENTOR AXADMIN

Command & Control: Anywhere, Anytime

## FEATURES

- Application Object Server (AOS) Management
- Batch Job Management
- Windows Services Management
- Receipt and Review of various Dynamics AX Notification Types
- Dynamics AX User Management
- Best in Class Infrastructure Security
- iOS native design
- Customizable Settings

## WHY USE IT?

Dynamics AX™ Administrators are responsible for maintaining AX™ and ensuring it is running optimally. They are responsible for monitoring key services, tasks and responding expediently to critical alerts and events.

For instance, Dynamics AX relies on various periodic batch jobs which run key tasks such as nightly invoicing so the ability to respond to an error from anywhere is paramount for an Admin teammate. AXAdmin was built to enable this type of 'anywhere' access using Microsoft best practices in mobile security with the ease of use afforded by native iOS functionality.
